

## ArborVue System Requirements

ArborVue can be setup in a number of configurations:

SQL Server 2005/SQL Server Express 2005 can be installed on a server or locally on the enduser PC. ArcGIS Engine 9.2/9.3 and the ArborVue Office module are installed locally on each licensed enduser PC. Following is a typical setup for a client/server configuration:

### Database Server (or local PC):

#### Software:

Appropriate database engine – SQL Server Express 2005 or SQL Server 2005  
.Net Framework 2.0  
SQL Server Management Studio

### Client/Mobile computer:

#### Software:

ESRI ArcEngine Runtime or ArcGIS ArcView 9.2/9.3  
.Net Framework 2  
ArborVue Office Module  
Windows 2000, XP or Vista

#### Hardware:

Processor: Intel Pentium or Intel Xeon Processors – 1 GHz or better  
RAM: 1GB minimum (2GB recommended for local SQL Server installations)  
Hard Drive Space: 350 MB

### Field Computer:

#### Software:

ESRI ArcPad 7.x

#### Hardware:

Pocket PC or tablet PC similar to iPAQ 24xx capable of running ArcPad 7.x
